New-age Mindset for New-age Orgs

Outcomes

Resilient Leadership

Adaptive Strategies

Agile Organisation

Coverage

Customer Centricity
(Being Consultative, DesignThinking)

Self Organising Teams
(Manager-as-a-Coach, Adaptive Psychometrics)

Collaboration

Learning-to-Learn

Rooted in

Agile Manifesto

Double-loop learning by Chris Argyris

Great Teams by Alex Pentland (MIT-HBR)

Jungian Personality

TRACE & DeepLEAP

Time Investment

6-12 Month Journey
Workshops : 2+2+1+n days
Action Learning
+Coaching Circles

#futureofwork #learningorganization #VUCA

Agile Mindset is the foundation on which solutions can be built to some of the new age problems that businesses face–such as changing market dynamics, rapid technological innovations, fierce competition, and globalization.

Though the word 'Agile' has its roots in the IT industry as a framework for building better software products, it has become ubiquitous across all industries, since most of them are facing disruptive changes at a faster pace.

Progile is one-of-a-kind program that prepares and orients managers/leaders to build future-proof organizations and teams. When participants are made aware of their mental models, they see their actions getting transformed in the way they relate to their customer needs (innovation and providing value) and in the way they design organizations. Deliberate reflective practices and action learning make a sustained change in patterns of learning, being an Agile leader and thriving in a VUCA world.

Rooted in the works of leading experts, *Progile* gives the optimum blend of concepts, knowledge and skills for the next leap of your organisation and its leaders.
